WORK EXPERIENCE

Staff Data Engineer / Data Architect @ BILL

07/2025 – Present

- Architected data products for **Enterprise AI**, enabling the **Starburst Galaxy / MCP** foundation and automating deployment and access workflows that supported 10+ stewards supporting use cases for 200+ business users.
- Replatformed 2K+ **Helm-chart-orchestrated Snowflake ETL/ELT** into a **Starburst/Trino + Iceberg lakehouse**, delivering 100% object parity through automated schema, row-count, and metric validation yielding ~\$27K/month cost reduction.
- Led migration of 200+ TB enterprise data warehouse from **Redshift** to **Trino** using **Apache Iceberg**, reducing cost by 60%.
- Built **GitLab**-based **SQL** governance through **CI/CD** workflows for 3K+ enterprise queries automating manual reviews.

Computer Science Instructor @ Houston City College

01/2025 – Present

- Delivered 3 courses on **Python** programming.

Senior Data Warehouse Engineer @ BILL

05/2024 – 07/2025

- Built **Python/SQL** GTM lead-generation pipeline using **Mastercard/Visa APIs**, **BERT invoice matching**, and **merchant clustering** to prioritize **1M+ Salesforce leads**, reduce redundant outreach by up to **1.9M calls**, and increase conversion by **30%**.
- Designed primary layer (star schema and OBT) in **dbt** using **Redshift** and **Snowflake** to create 20+ datasets for querying, supporting 10+ teams in strategic initiatives.
- Managed 10+ **ETL/ELT** jobs using **Apache Airflow DAGs**, **AWS Glue**, and **Snowflake** to automate reporting for 50+ users, leading to a 20% increase in data processing efficiency.
- Engineered an entity resolution (ER) pipeline leveraging **Python**, **SQL**, and external **APIs**, reducing data duplication by 65%.

Computer Information Systems Instructor @ Lone Star College

01/2023 – 03/2025

- Developed and taught 4 courses to 200+ students on statistical modeling, **Python** programming, and Cloud Computing.

Senior Business Intelligence Engineer @ BILL

10/2022 – 05/2024

- Built **Tableau** automation to streamline resource management using tags and support data-driven decisions for 50+ users.
- Automated financial reporting using **SQL** and **Tableau**, contributing to a 20% increase in operational efficiency and accuracy.
- Deployed ML models for forecasting, pricing, and vendor churn analysis using Python, improving customer retention by 20%.
- Engineered financial models and conducted A/B testing for 12+ marketing campaigns, generating \$10 M+ in new revenue.
- Scripted a custom Python package to automate business tasks, reducing manual effort by 80+ hours.

Business Intelligence Analyst II @ BILL

09/2021 – 10/2022

- Enabled 100k+ vendors for the virtual card product, generating \$200M+ monthly volume and enhancing cash flow efficiency.
- Collaborated with AI and Data teams on an **ML** model for invoice matching, contributing \$50M+ monthly.
- Resolved 200+ **Jira** tickets within SLA, providing ad-hoc analytical support to 12+ internal stakeholders.

IT Data Analyst @ First Community Credit Union

06/2021 – 08/2021

- Led a Machine Learning project in **Python** to forecast vehicle loan applications, generating 10k+ sales leads.

Operations @ Bloomin' Brands

08/2017 – 06/2021

- Generated weekly forecasts for sales, staffing, and procurement with ~5% error, optimizing operational efficiency.

EDUCATION

University of Arkansas at Little Rock | PhD in Computer and Information Sciences

Lamar University | MS in Information Systems

Texas A&M University-Corpus Christi | MBA in Data Analytics

University of Houston-Downtown | BBA in Management Information Systems

SKILLS

SQL, Python, dbt, Airflow/MWAA, AWS Glue, Spark, Snowflake, Redshift, Trino/Starburst, Iceberg, Athena, S3, CDC/SCD, dimensional modeling, data quality/reconciliation, Git/GitLab CI/CD, Docker, Kubernetes, Helm, Tableau, QuickSight, BERT, entity resolution

CERTIFICATIONS

AWS | Tableau Desktop Specialist | Apache Airflow Certified x2 | dbt Fundamentals | GitLab Certified CI/CD Associate | CompTIA x4
